

Six West appoints new Director in Dublin

Six West, Ireland is delighted to announce the appointment of Matthew Gee as Director of Operations with effect from July 2017.

Reflecting on his appointment, from their Dublin office, Matthew said, "I am very excited at the prospect of leading Six West, through its next phase of growth. We have an incredible team that continues to grow as we identify the most talented and motivated in the Industry. We have an amazing depth of experience and I have thoroughly enjoyed my introduction in recent weeks, becoming part of the Six West brand and understanding the way it operates with a core focus on delivering exactly what our clients require, to the letter. Our service portfolio addresses some niche Industry requirements, including providing a quality service for ferry, delivery, demonstration and observation flight requirements, each project managed to match our clients exacting requirements. Our private aircraft management portfolio covers a global distribution of customers and their exacting requirements provide us with the perfect environment to ensure we remain sharp with a safety and service centered ethos. We are in the process of setting up our Hong Kong offices and this has largely been a result of naturally occurring growth that has come to us as our reputation amongst operators in the region has taken a life of its own. These are exciting days for us"

Matthew brings a wealth of Industry specific experience to Six West and will now be leading the operations team that brings 24/7 support to the worlds lessors, banks, airlines and many of the leading business jet operators across Europe, Middle East and Asia.

About Six West

Six West specialises in offering high quality aviation solutions to the aircraft leasing Industry and the private aviation Industry. We provide turnkey support as required to include ferry, demonstration, lease transition assistance, crewing provision, IS-BAO safety auditing, flight operations support, human resource services and consultation to our select client base.

Six West maintains an extensive database of highly experienced, current and vetted flight crew based globally on all airline and business jet type aircraft and can respond immediately to our clients' requirements.

Six West provides flight operations support to our clients in the private aviation Industry: flight planning, fuel provision, dispatch, staff travel logistics, back of the clock operations assistance.

Six West offers pre-buy inspections, aircraft delivery, entry into service support and management support services.

The cornerstone of our success is built around our focus on client satisfaction.
