

Founders' Statement

Ireland is considered the birthplace of aircraft leasing and is recognised as the number one location globally in the sector. Over the past three decades, the industry's growth has been so overwhelming that service providers have struggled to match its demand for innovative, world-class leasing support services.

We founded Six West to fill this void. Our solid reputation has been built on efficient flight solutions, a talented team and a commitment to rigorous safety standards. A globally recognised brand, Six West is synonymous with innovation, safety, quality, efficiency and responsiveness.

While we remain focused on our core offerings, we are excited about what the future holds for us as we set new standards and innovative solutions within the aircraft leasing sector.

Our strategic expansion to Malta in early 2019 aligned with the Maltese government's efforts to attract aircraft lessors to its shores. The island's robust and business-oriented regulatory and fiscal system, has revolutionised the country's economy, positioning Malta as a strong and cost-effective jurisdiction for the aircraft leasing industry's consideration.

We are especially enthusiastic about our industry-first AOCs, which offer lessors an attractive alternative to the burden of long-term storage. By placing aircraft on a Six West AOC, they will maintain their airworthiness, earn revenue and ultimately preserve their long-term value.

Our spirit of innovation is driving new product development within the Av-tech ecosystem and we look forward to the Six West iQLab launch in 2020. This directly addresses the industry's need to grow with technology and maintain its focus on the future.

As we look ahead towards expanding our global reach, we remain committed to meeting the demands of the dynamic industry that we are all part of.
